

Consider the Need:

- 300 million people in Africa do not have access to clean drinking water.
- Nearly 150 children die every hour due to this fact. That's 3,600 a day, over 1.3 million a year.
- In Malawi alone, a country of 60 million, 45 million have no safe drinking water.

Water

It was a four-hour journey, and most of the women and children made that walk twice a day. No time for anything else. Not even a moment's respite from the heat of the afternoon. Just walking and carrying. Inside the bucket was a mixture of water, dirt, algae, cow and goat feces, bacteria, mosquito larvae and other insect eggs, parasites, and various waterborne diseases waiting for a host. This is what they walked miles and miles to carry back to their homes.

Wells

Below the ground they walked upon was a wealth of cool drinking water. It is simply a matter of digging deeper than hands can dig.

Cycle Tour Details

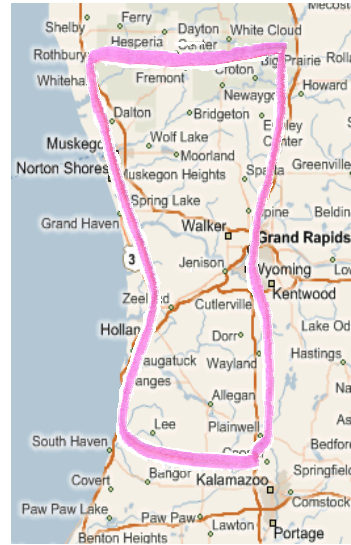

300 Mile, 6 day Scenic Tour

Starts: Sunday, June 15

Ends: Friday, June 20

Or 33 Mile, 1 day Kal-Haven Tour

Sunday, June 15

Kal-Haven Trail

Ride the first day with us, Sunday, June 15th. 33 miles on the scenic Kal-Haven Trail.

Meet: 1pm at the Kal-Haven trail head off 10th street.

Will require a day pass available at trail head

Consider the opportunity for Impact:

- If 100 people give \$20, we provide the equivalent of 5.2 million bottles of cool, clean, sanitary drinking water.
